future.

The cotton and grain markets experienced even more vigorous rallies than did stocks. March cotton reached down in the morning to a point slightly below the minimum of last December, which meant that the option sold lower than it had since 1915. The other months held up fairly well, and when Liverpool buying appeared in considerable volume all the options recovered to 40 able volume all the options recovered to figures above Thursday's last prices. and a better feeling in British manufacturing circles is made because of reported relief in England due to the Gov-COPARTNERSRIP NOTICE.

"Rather less doing in some big primary lines and markets," says Bradstreets, "but more business at small jobbing centres, particularly in the West and through the medium of road sales, give an appearance of irregularity to several of the large apparel trades and their kindred lines. That the improvement noted earlier in January in these trades has been maintained, however, and that current spring needs are demanding attention from retailers of dry goods seem evident in the despatches this week, Immediate need buying is still the subject of note, Even retail trade is a shade better, although it is noted that mild weather is a bar to much activity in heavyweight goods."

Burlington Flushers.

Bankers handling the proposed Burlington financing express the opinion that the Great Northern and Northern Pacific will put out issues of approximately \$70,000,000 each before July 1 to care for the balance of their obligations on the Burlington joint 4s, due on July 1. Nothing will be done, however, unt.1 the Interstate Commerce Commission takes action on the application to issue \$80,000,000 of bonds and \$60,000,000 of bonds and \$60,000,000 of bonds and \$80,000,000 of

Burlington's Capitalisation.

It is pointed out that in view of its large earnings the Burlington has a comparatively low capitalization. Including the \$140,000,000 which will be required to pay off the joint is and in addition to the current securities for which application has been made, its capitalization will be \$46,600 a mile, in contrast to \$69,513 for the Illinois Central, \$82,250 for the Union Pacific, \$63,183 for the Great Northern and \$87,113 for the Northern Pacific. The figures are recapitulated thus:

Pullman Company.

According to reports from Chicago there will be no change in its regular 2 per cent, quarterly dividend rate when directors of the Pullman Company meet next week for action. One of the directors was quoted as saying that there would be no change in the rate and that such a thing had not been considered,

the fact that many large international houses, which generally participate in underwritings, had not taken part in any recent offerings, largely as a precautionary measure and to await developments on the other side. He expressed the opinion that those houses which had been standing aloof had a tremendous reserve power of credit to throw into the balance on the constructive side when the time should be ripe.

New York in rates for rediscounts and advances occurred yesterday and the revision was upward, the bank announcing that the preferential rate of 5½ per cent. for advances and rediscounts on certificates of indebtedness had been abandoned. The despatch from Washington regarding the favorable report in the Senate on the miners' reimbursement bill had a favorable effect on zine stocks, which have been in the doldrums for considerable time, and they became unwontedly active, with a slightly upward tendency. Under that bill, small producers of zinc, tungsten and other minerals, who patriotically responded to appeals from the Government for increased production and were left flat with big stocks of metal on their hands when the price broke sharply after the armistic was signed, would be granted relief.

So heavy was the volume of selling arders in Crucible Steel at the opening yesterday morning that no flat price ould be reported, and its opening sales were grouped between 87½ and 88½, against Thursday's close of 89½. No explanation of the selling was found in the news of the day, but the report that it was largely for short account was borne out later by the premium of ½ on borrowed stock. That premium was raised later in the day to ½.

United States Rubber.

There will be no immediate financing to fund the \$43,405,000 of notes and loans payable, disclosed in the balance sheet made public yesterday by the United States Rubber Company, according to reliable information obtained yesterday. The company has plans for gradual liquidation of at least a part of these obligations without resorting to permanent financing, it was said, and does not desire to fund the dobt at present high rates unless necessary. Slow collections, especially in the footwear branch of the company's business, was responsible for the unusually high loan account, it was said.

Seniority Rules in Effect.

In lightening up their pay rolls, as the railroads have been doing since the first of the year, most of them have adopted the polley of using the seniority rolls. Men who have been in the offices or on the roads will remain the longest and, when taken back, will be resembleyed in the same order as dismissed.

Florida Selling.

Florida Selling.

For eleven months in the year Florida means little else than a pleasant State to most of Wall Street. Just at the moment, however, it is an important factor because most of the big bears have gone into hibernation by the Gulf and have not failed to drag branch offices, pink selling slips and telegraphers along to their places of winter vacation. Most of the heavy selling of stocks in the last three days is reported to have originated in Florida.

Gold Imports.

Cent. for advances and rediscounts on certificates of indebtedness had been abandoned. The rate becomes 6 per cent., or the same that applied to paper secured by Liberty bonds and Victory notes. Similar steps had been taken by other reserve banks earlier in the week. In a statement issued yesterday and malled to member banks the reason for the step was explained as follows:
